**Error1**

>>>>>          Method Not Allowed Error – 405

**Solution**

>>>>>          In function index(), the value of 'note' variable needed to modify from request.args.get() to request.form.get() in app.py file since the web application is using POST request method. Finally, in a html file named home, POST method needs to be specified in form tag and reference to index() function needs to be mentioned using action feature available in form tag.
